

Click on the arrow by Certificates - Current User, then click the arrow by Trusted Root Certification Authorities, then select the Certificates folder under Trusted Root Certification Authorities. Then, scroll through the listings and select all certificates the have the phrases, "Common Policy", "Federal Bridge", "Federal Common Policy", "SHA-1 Federal Root CA" in either the Issued To or Issued By columns. Then, click the red X delete button. You may need to do this several times, to get them all. [Note: Not every certificate that needs to be removed is shown in the screen capture below. Be thorough and remove the certificates described above.]
